

Wordchain Surgery

A premium, focused brain-teaser interface built around the signature loop: morph the word, obey the theme, celebrate the chain, and share the solve.

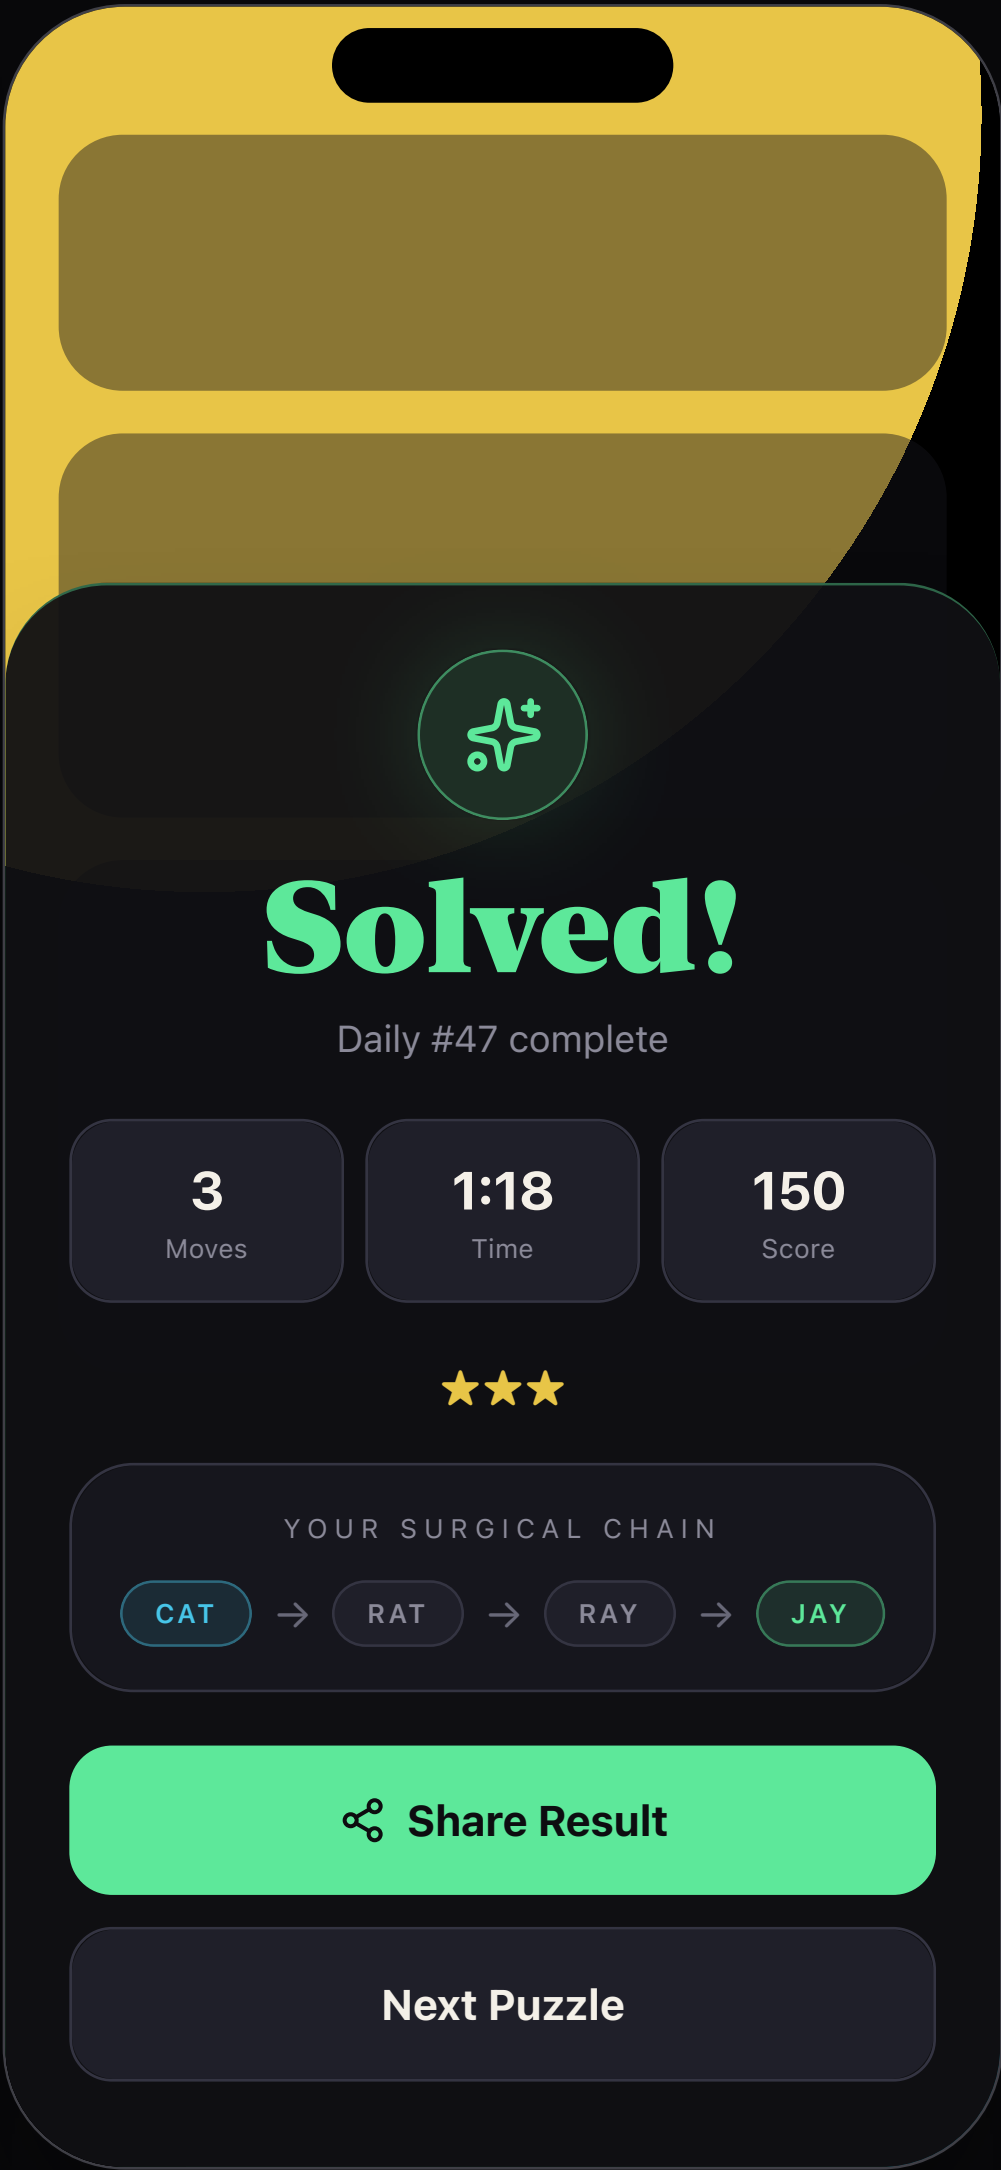

01 HOME / DAILY HUB

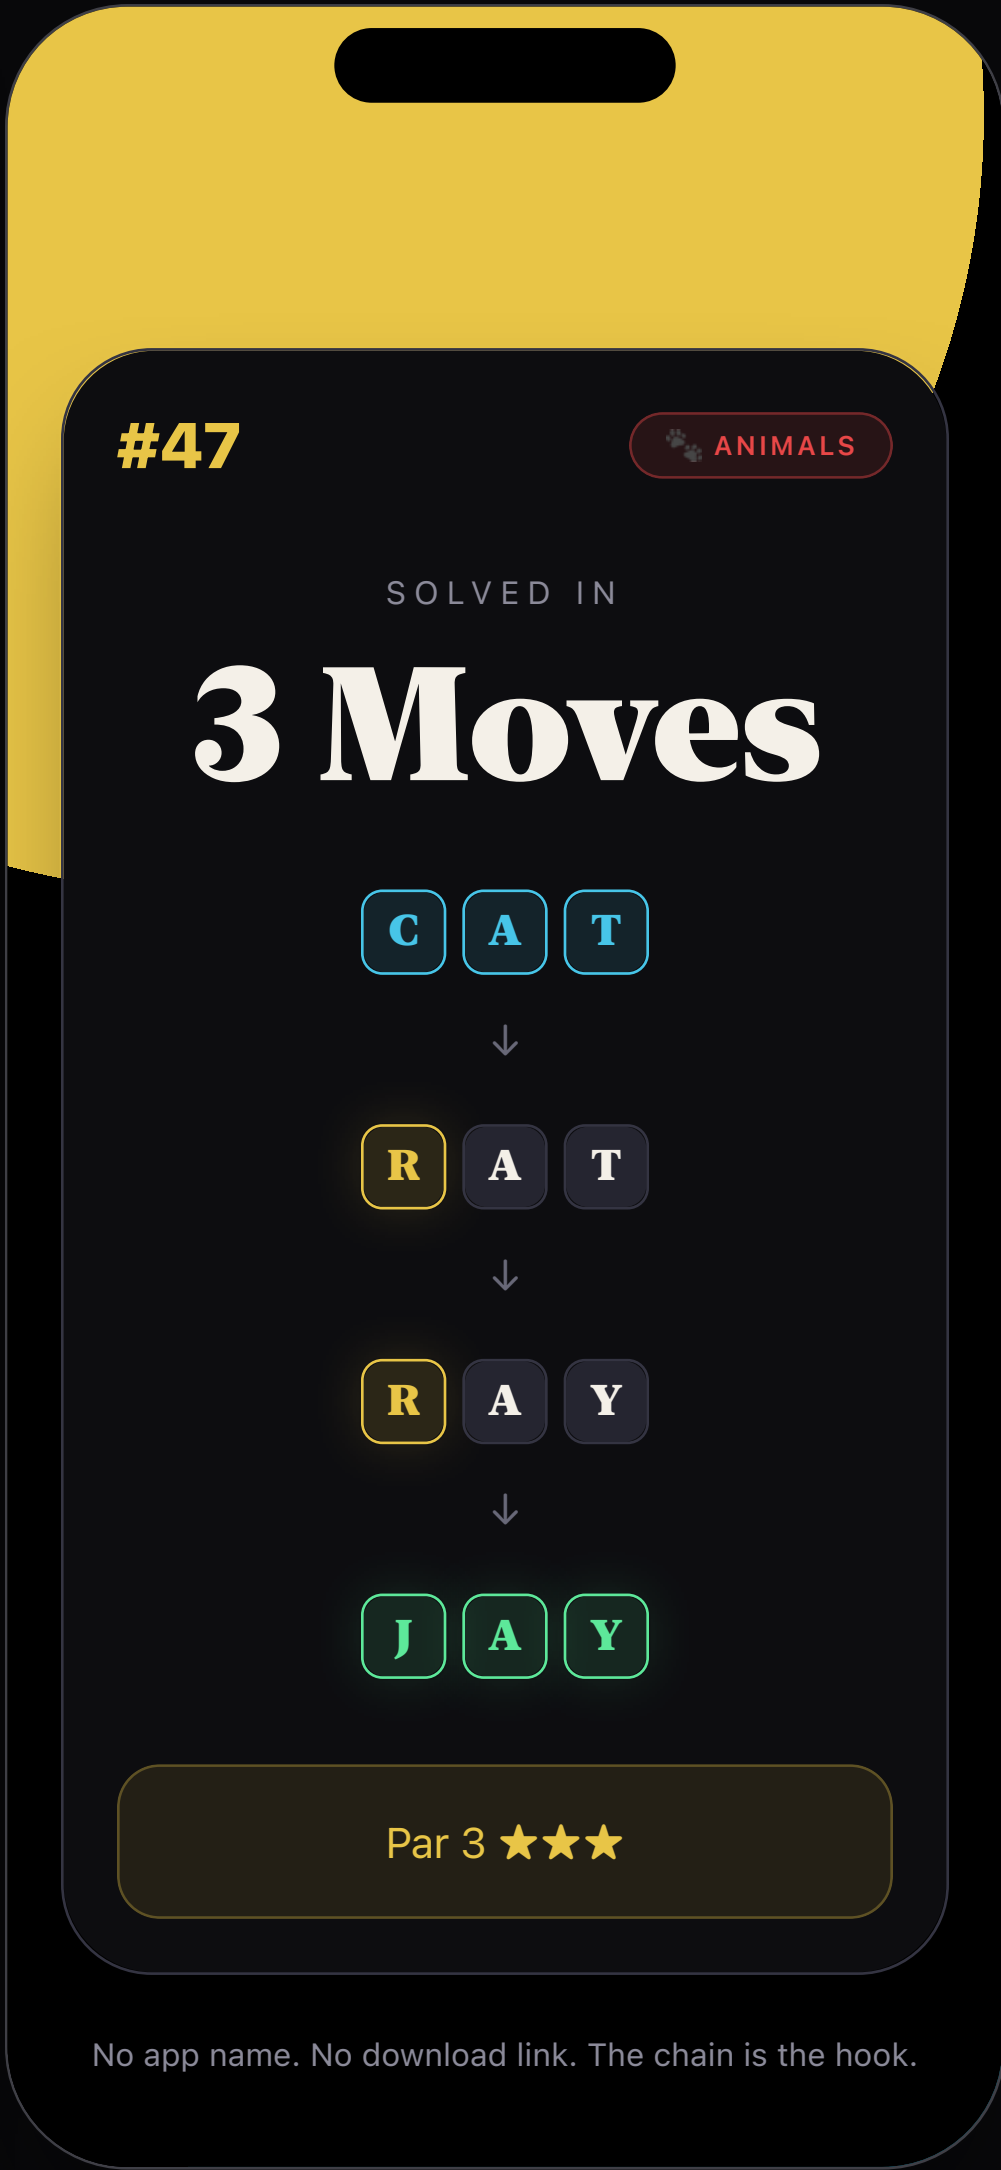

02 ACTIVE PUZZLE

03 WIN + SHARE MOMENT

04 GENERATED SHARE CARD PREVIEW

DEVELOPER NOTES

SwiftUI structure: HomeView, GameView, WinView, ShareCardRenderer, and bottom TabView map directly to the mockup screens.

Interaction model: changed letters should pop, invalid input should shake, win sheet should delay 300ms after the final submit.

Visual system: dark surfaces, gold action/highlight, green target/success, blue start word, red theme constraint.
